**Integrated care & support:** We integrate team-based primary care with health promotion, illness prevention and community development programs

**Community-Centered:** We focus on the most appropriate services for our Northumberland County community, in particular those with complex healthcare needs

**Address Social Determinants of Health:** We support individuals, families and communities to achieve health by addressing “social determinants of health” such as poverty, access to shelter/housing, education, language barriers and other factors that have a direct impact on health
